How to Use Using Hash MP3 Cutter is quite simple. You can either choose "Begin" or "Open" from the application's window. When the application starts, it will automatically open a file you can use to trim your MP3 file. You may choose the "Select File" from the Tools button to open a window with file list. You can also specify the File Type, File Name, File Path or File Size to open the target file. When you have specified your file, simply click the "Start" button to begin trimming your MP3 file. If you prefer the result of automatic trimming, just leave the Duration field and click the "Start" button. Hash Mp3 Cutter will then automatically trim your MP3 file into equal parts by matching the Duration field. Otherwise, you can manually trim your MP3 file into parts by simply dragging the desired part in the file window and dropping it where you want to split it. If you want to further edit the tags of your newly trimmed MP3 file, just double-click the Mp3 tag editor and then click the "Edit MP3 Tag" button. You can then click the "Save" button to save your changes or click the "Exit" button to exit the Mp3 tag editor.
