HIPAA Compliance The Health Insurance Portability and Accountability Act (HIPAA) is a set of laws that govern the electronic transfer of patient health information within and between healthcare and insurance organizations. Not only does HIPAA protect patients' privacy, it also puts your patients' rights first – like being able to access, review, and/or request all of their medical information. HIPAA is supposed to protect your patient's privacy. But unless you and your practice are HIPAA compliant, you expose your practice to some serious risks. This is because HIPAA allows patients to request access to their medical records, something that most doctors and medical providers assume shouldn't be allowed. If the patient feels they aren't receiving the information they are entitled to, they can lodge a complaint with the federal government. We've been helping practices become HIPAA compliant for many years. And after decades of experience, we can ensure your practice is properly set up and ready for the risks of a highly-regulated and litigious industry. Our HIPAA compliance package includes: Technical audits and correction of system deficiencies Implementation of a HIPAA compliance plan Signing of an auditable Business Associate Agreement (BAA) CERTIFIED HIPAA COMPANY We've been helping businesses become compliant for more than 25 years. Unlike some HIPAA compliance companies who are so new they don't yet have any satisfied customers, we can prove it./* * Licensed to jclouds, Inc.
