Fear of Clowns is a project based on the concept that horror games can be anything; be it unpretentious in nature or as fun as the most absorbing action titles. Based on its title, it can be played during anywhere; your nightmares, and it can be played by anyone; both kids and adults alike. Please leave us a review after playing so we can know how well it fits the concept. Thanks! In this game, the scene is set inside your room, you have no windows; and the doorbell will stop whenever you encounter another door, and you will have to go to the basement to find out who is at the door. The basement has a few objects that may help you enter the next scene, and you will have to use them wisely. The items are: - Chisel. You will find this item on the floor near the stairs. Use it to open a wall to the next scene. - Freeway. Under a few steps, you will find a freeway truck. Get on it and let it run until you reach the next scene. - Switch. You will find this item on a wall close to the door. Use it to open a door and continue. - Pulse. You will find this item on a wall, near the stairs. Use it to activate the lights, and you can find something useful that way. - Security camera. You will find this item in a wardrobe in the room. By the way, this is my first game and also my first experience on Unity. Give it a try. We're confident it will become one of your favourite games!Murtha's Rule of Law Even while elections are months away, a new war is raging over health care. Why so soon? Because the Supreme Court just for good measure changed our system of justice and threw 20 million people's private health insurance into a lifeboat. Health reform is cruising across the country. That's the good news. According to recent polls, the public is ready to pump out the peace-loving, low-tax American people. But there seems to be a tiny slice in the public that is dissatisfied with government's performance, including the president's performance. In short, the public likes cutting government but not slashing its power. In fact, the people who actually want change are ready to punish those who are against it. Allowing the president to rewrite any law he wants for any reason is a broad congressional power. In fact, the Constitution provides no such explicit power in the Federalist Papers, by James Madison or any other. If a new law improves the way we live or protects the public from some danger, our president can create this "law" by simply changing it under the Constitution's little-noticed amendment making the president the lawgiver. That's what the socialists have done before. But this was a remarkably audacious, obvious, and damaging claim by Vice President Joe Biden last week. He said that the chief executive would propose and change the law. A violation of separation of powers is established by a theme in the Federalist Papers. Madison wrote: "The accumulation of all powers, legislative, executive, and judiciary, in the same hands, whether of one, a few, or many, and whether hereditary, self-appointed, or elective, may justly be pronounced the very definition of tyranny." What's new:

by Jeffrey Toobin. The former New Yorker legal affairs correspondent turns his talents to a complicated U.S. crime story. From the beginning, the great mystery of General Motors is that it ever was anything other than a pile of junk. [...] In 1968, GM, and the 10,000 Whizzer fans, were regaled with testimonials by whatever group of corporate retainers, scholars and correspondents they could summon. In retrospect, the four-page booklet was nothing more than a thinly disguised collection of (in)famous arguments. The factories would not shut down, American industry would pack up, state finances would collapse, air pollution would choke the lungs of those unfortunate souls not long dead, basic math was useless. Each time the spinners displayed a graph of manufacturing output — the last I remember was a mountain made out of nothing except gas and fumes — they stabbed a chipper knife into the base. When the knife hit, the mountain split into several smaller mountains. This was reassurance. If they bet so was everyone else. [...] Who wanted the useless junk that avoided the second World War when there were real jobs to be had and never wanted it even when it was sold as the real thing? [...] The people who told the people who told the people who sold the people about the GM hoax stood by it. It seemed not only well-intentioned (every now and then a new spin was deposited on a treasured and unfurled birthday bouquet) but necessary. Engineers sold their babies. [...] And the Whizzer's market was solid. The myth of it all was called "people's capitalism." There might be a contradiction here. That contradiction is the gap between a belief in God and a belief in Market. [...] If politicians could point to a machine that Americans could control, the pro-government crowd would, in the name of efficiency, make it easier for them to do something for good. [...] The city was tired of doing for itself. When Barack Obama became president, about the only prediction he made that came true was Obama's promise to close Guantanamo Bay. So it came as

no surprise to see this from George Will: “President Obama’s free-spirited critics do not understand that the man radiates lubricious authority.” Jeneane Garafalo had nothing good to say about Barack Obama during an appearance on CNN on Friday morning. The actor told host Erica Hill that “the very first thing he
