Although, I checked the internet, I don't found anything. By the way, this is my first post here, so I'm sorry if I made any mistakes. I hope I can solve this problem, and have a nice day with you! A: Edited: you want to save the entire directory (your_folder) to your HDD. There are two ways to do so. The first way, is to use the console to copy the directory to your HDD. There, you can read more about this in the following bash tutorials: copy - Copies one or more source files and/or directories to one or more destinations. xterm # cp -r /Volumes/Valkyria_Nyotai_Kyouran_Haze_Otome_CGrar/ /Volumes/Valkyria_Nyotai_Kyouran_Haze_Otome_CGrar/ BTW, since you want to backup your "Valkyria Nyotai Kyouran Haze Otome CGrar" folder to another location, it's better to use the OS X "Finder" application, instead of the "Console" since you can backup with the app (and have a history, etc..). The second way, is to use the Finder. Open your Terminal application, and use the Finder application. Type in the Terminal application: ~/Valkyria_Nyotai_Kyouran_Haze_Otome_CGrar # cd /Volumes/Valkyria_Nyotai_Kyouran_Haze_Otome_CGrar ~/Valkyria_Nyotai_Kyouran_Haze_Otome_CGrar # cp -r.. In my example, since your folder is in the same drive than your Terminal session, you don't have to specify the drive. But if you want to, you can. Now, as said above, the reason for your messages "Cannot mkdir" could be the following. Your home folder has a "hidden" folder ".bash_history". To edit your home folder (and not only your login home folder) you have to use the terminal. Type in your terminal: cd ~/ ~ is the equivalent of your d0c515b9f4

A: Cuando usas los códigos hexadecimales los cuales pones en descripción siempre deben ser con las llaves (:) antes del nombre del código para que iGoogle de google chrome pueda leerlo, por ejemplo: 35AA: código hexadecimal de asterisco y A como conjunto de corchetes (:). 302E: código hexadecimal de tilde (~) y E. No tienes que meter el código hexadecimal directamente en la descripción, por ejemplo: 2015: código hexadecimal de 2015 6361: código hexadecimal de 6361 Con estos códigos en la descripción tienes que dejar su terminación entre paréntesis (:): (35AA) (302E) (6361) Biphasic carcinogenesis in the mouse skin as affected by 7,12-dimethylbenz(a)anthracene.
