## 4clipika Patch For Windows 8

thanks for the new and improved software! i need to re-start my old computer but what a great way to do it! it's so much easier without having to mess around and click-click-click. the programs i want to run are usually very large so, while it would have taken hours to run, it would have been a pain in the butt to delete everything. this way it's an easy breezy method of installing updates, regaining system information, and then restoring my programs i need to run (thanks for the updates). i've had computer problems for the last couple of years because of not updating my computer. thankfully the site for my program made it so easy to do with the exe. thanks again for the wonderful program!!!!

i've had computer problems for the last couple of years because of not updating my computer. thanks again for the wonderful program!!!! ive been running a dos automotive software program since 1988 at my auto shop, from windows 3.1 to now windows 10/32 bit, but still testing the reliability of w10, so just in case theres problems i can revert back to windows 7 which i have been using for the past 5 years or so. yes there have been several automotive windows programs ive tried out through the years but i have got so used to this particular program (microbiz) that i dont want to change unless i have no other options. so far w10/32 has been working for the 3 weeks ive used it. thanks for the awesome software.. i love my new boot cd which works perfectly! i can't tell you how happy i am! i was in a bind and you came up with a wonderful solution that worked right out of the box and fixed my problem. i have searched long and hard for a way to get the microsoft updated database running and this is the only way i have found to fix this issue. it also helped me to remove the registry value in the event that i ever have the same problem again. of course i would not trade my new imac for any other computer, however, i am still using an older personal computer. i chose to keep it because it is a reliable and highly functional computer. that's what i wanted and thats what i have. ive never had a computer working so well and when you tell me my computer is 90% faster as it used to be, i just can't see it! i downloaded your boot disk and tried it. within a few seconds the computer is back to running like i had it in the very beginning! ive got a new computer that's fast and small and it's a fully loaded imac. but with your boot disk, i can run an old pc with the mac operating system and performance is the same, if not more like it. why not? ive got a new computer that's fast and small and it's a fully loaded imac. there's no comparison. i have never had a computer come out of the box (when i first bought it) and come back running so good as this one did. the dvd is a true gift. i am writing from my macbook and this is my first mac. i had no idea my old 5 year old pc at home could run this fast. i was skeptical when you said it would run as fast as my first computer, but it did. thank you so much. 5ec8ef588b
