the meaning of this version number is that it is a version from the gnu project itself, not from an sfs package. it is not from a distribution, just one of the many sfs packages of gnu emacs that are available from ftp.gnu.org/gnu/gnu-emacs/ . the package name is "gnu-emacs-f9.9a". to get the packages for this version, download the current release. it is also available from ftp.gnu.org/gnu/gnu-emacs . emacs packages using the gnu project's version numbering system have the version number "9.9a" appended to their name. the sfs packages of gnu emacs currently are numbered as 8.5. these numbers will not change for the time being. all sfs packages of emacs, regardless of the version number, will be identical, and will all include the following files:
