I am looking for the driver files for my new BenQ scanner. The scanner was working just fine until it gave out, now I can't get it to work at all. I have tried all the methods listed here, as well as through the manufacturer's website. The version on the website is dated 2011. That's fine I have an older version of the scanner's software still on my computer... My problem is that when I try to make an active connection using the driver CD, it gives me an error stating that I am not using the correct driver. I had the scanner set up at work and it would always work right then, but when I brought it home, it would not connect at all. I had to unplug it and plug it back in, and now it is trying to read, but gives me this error. I have tried most of the methods listed here, and nothing worked. Can you help me please? Thank you.
